

Green Waste Cans Becoming Available - Changes to Allowable Material

There has been a change to the acceptable material for the garbage cans. The landfill will now accept thorny material if placed in the yard waste cans.

The Public Services Department has distributed a brochure to each City resident about the upcoming changes to the Refuse Program in your Utility Bill. The changes were adopted by the City Council during the annual budget process, and will introduce a new yard waste can. The new yard waste can will be brown in color and is an optional service for each resident.

In order for the new waste cans to be delivered in time for the services to begin on March 1, 2008, the form attached to the brochure is due by November 30, 2007. Please review the brochure and visit the website www.slcwaste.com to learn more about this exciting program.

The program also allows residents to determine if a smaller general waste garbage can would be more appropriate for their home. After reviewing the information, if you still have questions, please call Cory Young at 535-7116.
